0.55 mm wear layer

This is Amtico Click Smart

No-mess click flooring perfect for quick turnaround projects.

Click Smart is Amtico's loose lay rigid core LVT with integrated underlay.

It has the same flooring qualities that you expect from Amtico, but its adhesive-free application makes it quicker and easier to install.

Click Smart features the latest rigid core technology making it stronger and more resistant to expansion and contraction. It's suitable for light commercial and residential applications.

Specify Amtico LVT for:

Lasting appearance

Low maintenance

Easy cleaning

Parquet designs

Timeless and classic, we've now added six parquet options to the Click Smart collection, bringing even more design flexibility to our loose lay offering.

Each product has been carefully selected for its authentic tones and wood grains which enhance the effect of this enduring laying pattern.

Planks:
114.3 x 609.6 mm (4.5 x 24")

Scandi Oak - Parquet CP05

Beachcomber Oak CP06

Hushed Oak CP04

Scandi Oak CP05

Linden Oak CP02

Nordic Oak CP01

Smouldered Oak CP03

View our installation video on our website

The beauty of natural wood is undeniable, however commercial demands require a product that combines both performance and charm.

We have captured the detail of real wood, with the quality of performance and ease of installation you expect from Amtico LVT.

An In-Register Emboss follows the wood grain, creating a natural effect realistic to the eye and underfoot. The tones and colour variation from nature are designed into this LVT, hiding the effects of traffic and bringing visual movement across a space.

Burgenheimat Apartments

Location: Rhens, Germany
Sector: H&L
Products & Laying Pattern:
Weathered Oak, laid Stripwood

The recently renovated Burgenheimat Apartments are situated in the historical village of Rhens, Germany, in a busy tourist area.

The subtle, natural tones of Weathered Oak create a versatile backdrop for these apartment renovations.

Amtico Click Smart's rigid core, adhesive-free technology is ideal for spaces that need quick turnaround refurbishment – more than 400 sqm were laid quickly and easily over the existing hard floors in this project.

The high performance integrated underlay also ensures improved acoustics, helping to create a sense of calm and tranquility in these modern, cosy apartments.

Visit amtico.com for more information on our product range, inspiring ideas, maintenance and installation advice. Every effort is made to achieve accurate reproduction of products in this brochure, however printing limitations can be misleading. Selection of products should be made from actual samples. Samples are small pieces cut from standard tiles. They give only a general indication of the design. Tone and shading can vary slightly from batch to batch and it is not possible to guarantee that the sample will exactly match the material supplied. The policy of the Company is one of continuous development and improvement and the right is reserved to add or delete from the range or change patterns without prior notification. All products are manufactured in line with EN 1651.

A. Urethane Coating

B. High Density 0.55mm Wear Layer
Gives excellent impact resistance and high clarity, allowing the product designs to shine through.

C. Design layers
Carefully crafted print films create the distinctive Amtico Wood, Stone and Abstract product designs.

D. Core Layer
Contains up to 20% recycled pre-consumer content.

E. Fibreglass Reinforcement Layer
For reduced coefficient of thermal expansion and improved dimensional stability.

F. Rigid Core Layer
Contains profile for high locking strength and up to 20% recycled pre-consumer content.

G. Backing Layer
The foundation of the product which provides long lasting stability.

H. Acoustic backing layer / underlay
Reduces the impact sound insulation by up to 20dB and provides an extra level of comfort underfoot.

Amtico Click Smart products are specified as standard with integral antimicrobial protection.

We add an ionic silver additive to the urethane coating that provides a hygienic surface where bacteria and viruses will struggle to multiply or survive.

Embedded antimicrobials are not designed to replace cleaning and disinfection, but to provide an additional level of protection between regular cleaning cycles in high traffic spaces.

Under independent tests this additive in our product has been proven to reduce bacteria growth by >99.9% over 24 hours when compared with an identical control without the additive. All our antimicrobial flooring achieves the same levels of high performance against sunlight, scuffs and stains and heavy traffic that you expect from any Amtico floor.

Independently verified against E.Coli and MRSA, to ISO 22196, showing a reduction of >99.9% after 24hrs. Also tested against SARS-CoV-2, to ISO 21702, showing an 85.5% reduction after 24 hours compared to an untreated control, and a reduction of >99.9% against the initial inoculation.

"If extra levels of hygiene are needed, it's reassuring to know this floor is tested and proven to provide it."

John Baggaley
Technical Specialist

 EN 14041 CPR/A1/SEL4	The CE mark is a confirmation by Amtico that our products are in compliance with European health, safety and environmental requirements (as required by Council Directive 89/106/EEC and detailed in EN 14041).
